

NordVal Certificate

Issued for:	Bioline Salmonella Optima
NordVal No:	010
First approval date:	4 Mai 2001
Renewal date:	1 April 2007
Valid until:	1 April 2009

Oslo, 2 April 2007

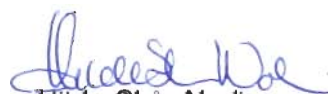

Bioline, Fredericiavej 414, 7080 Børkop, Denmark has applied for renewal of the NordVal certificate for Bioline Salmonella Optima for detection of Salmonella in foods and animal feeds. Bioline Salmonella Optima is produced by Bioline Aps, Børkop, Denmark.

NordVal has studied the application for renewal and the references given to the previous validation by NordVal and AFNOR. NordVal concluded that it is demonstrated that the requirements of the NordVal validation protocol are fulfilled. The results document no statistical difference in the performance compared to the ISO 6579:2002 and NMKL 71. NordVal has also noticed and accepted the updated package insert. ISO 16140 was used for the comparative part of the study in the AFNOR validation.

Please note that NordVal should be informed of any changes of the method. Further that the certificate is valid for two years.

Yours sincerely

Sven Qvist
Chair of NordVal

Hilde Skår Norli
NMKL Secretary General
